Pau Alcázar

Data & AI Engineer

Barcelona, Spain · github.com/drpauu · LinkedIn

PROFILE

I build data systems, APIs and digital products. My work connects software engineering with data and AI, from the first requirements to deployment and the details that keep a system running.

PROFESSIONAL EXPERIENCE

Accenture Jun 2023 – Present

Data & AI Analyst (AI Decision Science)

Delivering data, AI and cloud solutions from requirements and architecture through implementation, testing, deployment and production troubleshooting.

- Build data pipelines and APIs across AWS and Azure, including PySpark ETL, analytics, asynchronous processing and serverless delivery.
- Develop generative AI applications and supporting architectures with Python, FastAPI, web interfaces and cloud services.
- Apply data quality, traceability, privacy, testing and observability controls throughout delivery.
- Work with clients and multidisciplinary teams to turn functional needs into maintainable technical solutions.

Superprof Sep 2021 – Present

Technology Subjects Tutor

Teaching programming, algorithms, operating systems, mathematics and physics.

- Adapt technical explanations and practical exercises to different student profiles.

EDUCATION

Bachelor of Science in Computer Engineering 2020 – 2024

Universitat Politècnica de Catalunya (UPC) – EPSEVG

Software engineering, algorithms, databases, operating systems, networks, data science, cybersecurity and parallel programming.
